

# BAND BLADES

## FOR BREAD CUTTING MACHINES

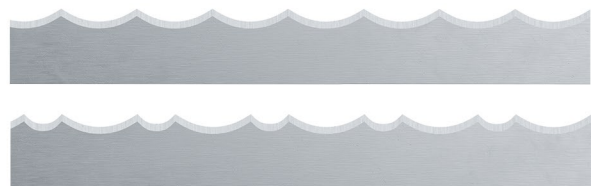

for precise cutting of toast and rye mixed bread

### High quality with optimal cutting performance

- ▶ An equal cut on the whole cut side.
- ▶ High durability for bread varieties with a high rye and wheat grain content.
- ▶ Stringent, computer-controlled quality control throughout the production process.
- ▶ Innovative toothing and stamping technology as well as coating.

The toothing profile of the band blades is optimally adjusted to the respective requirements.

Each set of band blades is precisely produced and complies within a minimum length tolerance of  $\pm 0.015$  mm.

The band blades can be specially offered with a coating.
